

Catastrophe Analyst

We have the following job opportunity in our **New York City or Miami** office:

Description

The Catastrophe Analyst is part of our modeling team, which provides in-depth analytics and expertise to our North American underwriters as well as delivering catastrophic peril related projects to the business in order to better understand and manage our risk. Responsibilities include but are not limited to:

- Performing data formatting and modeling analyses of individual catastrophe excess, pro rata and per risk programs and providing knowledge in the areas of catastrophe modeling, data quality and pricing for property catastrophe and specialty reinsurance business lines.
- Liaising with the underwriting department on review and interpretation of the modeling output, pricing reinsurance contracts and added analytics based on catastrophe model results.
- Interacting with peers internally as well as within brokers and client companies to ensure clear understanding of data requirements, quality and completeness of data provided, and interpretation of modeling results.
- Developing and improving the catastrophe modeling inputs and metric outputs used for reinsurance pricing, consult on appropriate uses of metrics to inform decisions.
- Guiding efforts to improve data quality within the team and in collaboration with clients/brokers. Leading model studies including the validation of underlying science, usage, and outputs.
- Ad-hoc project work assisting other departments including Risk Management, Actuarial, Global Property and Underwriting including post event analysis, model validation and experience rating studies.

Requirements

- 2+ years of experience with two of the major catastrophe models (AIR & RMS). Experience with modeling in a Reinsurance firm or within a broker setting is preferred
- Fluency in Spanish is preferred.
- Must possess knowledge of modeling property insurance and reinsurance business and of various types of reinsurance/retro structures.
- Good understanding and experience with writing SQL queries/stored procedures as related to the catastrophe modeling is required. Programming skills including R, VBA, Power BI and Python a plus.
- Ability and desire to work in a fast-paced business environment. Demonstrated ability to work collaboratively and engage multiple stakeholders from across the business.

Work Schedule

TransRe is supportive of an agile work schedule, which may differ based on individual roles, your local office's practices and preferences marketplace trends, and TransRe's business objectives. This position is eligible for a hybrid work schedule with approximately 3 days in the office per week, with the remainder of the week remote.

Compensation

In addition to base salary, for this position, TransRe offers a comprehensive benefits package, paid time off, and incentive pay opportunity. The anticipated annual base salary range in New York for this position, exclusive of benefits, paid time off, and incentive pay opportunity is \$100,000 to \$130,000. This range is an estimate and the actual base salary offered for this position will be determined based on certain factors, including the applicant's specific skill set and level of experience.
