

## **IT – Agentic SDLC Testing**

We have the following job opportunity in our **New York City** office:

### **The Internship Program**

- The program will be 10 weeks and will run from early June 2026 through early August 2026
- Weekly work schedule will be 35 hours and follow a hybrid schedule, with 3 days in-office and 2 days remote. All interns will be in-office on Tuesdays and Wednesdays
- During the program, the intern group will attend a series of educational sessions to provide them with perspectives on our company and the broader reinsurance industry
- Training and social activities will be structured into the program, allowing for networking opportunities with peers and colleagues

### **Description**

This role will provide exposure to TransRe's QA and testing teams, with a focus on building Agentic SDLC testing frameworks to modernize and automate quality assurance processes across TIRS Web and related platforms. The Intern's responsibilities and learnings will include, but not be limited to:

- Assisting in the development of Agentic testing frameworks and agentic workflows to automate test case generation, validation, and defect detection
- Working with QA teams to integrate agents into the Software Testing Life Cycle (STLC), including regression, functional, and automation testing
- Building proofs of concept for intelligent test automation, including self-healing scripts, test data generation, and Agentic-assisted defect analysis
- Supporting CI/CD pipeline enhancements by incorporating automated testing and validation using modern tools
- Collaborating with development and QA teams to improve test coverage, efficiency, and release quality through Agentic-enabled approaches

### **Requirements**

- Currently majoring in Computer Science, Software Engineering, or related field (or intending to major if not yet declared)
- Basic understanding of software testing concepts (manual and/or automated testing)
- Familiarity or interest in test automation tools, CI/CD, concepts
- Exposure to programming/scripting languages (e.g., Java, Python, or .NET) is a plus
- Interest in emerging technologies such as Agentic-driven testing, and automation frameworks
- Availability to participate in the entirety of the 10-week program
